intent of this body which shall predominate the field of spending money. And previously we never have. And I hope this will be the start of a new plan where from this time on this body will take the responsibility, graciously in the area in which we authorize spending of money and not give the authority to someone else, particularly the Governor of the State of Nebraska to spend it as he so desires. This is the body that has the final say in the area of what we spend this money for. And we shouldn't advocate our responsibilities to anyone else. And particularly where we are freely criticized for doing the thing which is too loose in my a..judgement. Would you and your committee comply with that? And I have nothing further to say, Mr. Chairman, because it all revolves around the money in the balance of the bill in order to break it down so you have as much information as the budget committee did and making up their mind what they are apparently recommending to this body.
